

Tango Edgelit Display

The 40mm deep Tango profile provides a traditional "picture frame" style with a pin or key locked, hinged door for simple image changing access.

Designed for internal application, the Tango can be adapted for a variety of uses beyond a standard poster display, including theatre poster displays with changeable headers to marketing displays that include LCD screens.

Your choice of frame colour can be achieved with powder-coated or spray painted finishes.

T5 lamp technology means longer operating life, higher light output for power consumed and excellent colour rendering for your images. Average effective lamp life is 16000 hrs.

Simple image changing is achieved by opening the fully hinged acrylic door and clamping the image in the retaining magnets.

Electrical certification ensures all Interium products meet safety standards.

Quality manufacturing means the Tango display will continue to perform for many years to come. The product is supported by a 12 months warranty on general construction and OEM warranties supporting tubes and electronic ballasts.
