

Ultima Non-Illuminated Poster Display

The 12mm deep, hinged cover Ultima is a "tablet" format poster display matching the aesthetics of the Strada lightbox. The integrated, hinged cover hides the fixings used for mounting and does away unsightly mitred corners that are found on snap edge poster holders.

Designed for internal or protected external applications, the Ultima is the perfect poster display. It can be mounted on cables, used as a freestanding display, or wall mounted. To add to its function the Ultima can be supplied as a back lit poster module that can be mounted over an existing light source.

Simple image changing is achieved by opening the hinged acrylic cover and clamping the poster in place with magnetic clips.

Your choice of frame colour can be achieved with powder coated or spray painted finishes.

Quality manufacturing means the Ultima display will continue to perform for many years to come. The product is supported by a 12 months warranty on general construction.
