

Civic Double-Sided External Edgelit Display

The 80mm deep, weather resistant, Civic is a "tablet" format sign that has 6mm glass or acrylic door panels.

Designed for internal and external applications, the Civic can be mounted on posts, used as a freestanding display or cantilevered from a wall.

Superior panel brightness is achieved through Interium's edge-lighting panel technology. The high brightness and even illumination supports a true representation of your graphic display.

Your choice of frame colour can be achieved with powder coated or spray painted finishes.

T5 lamp technology delivers longer operating life, higher light

output for power consumed and excellent colour rendering for your images. Average effective lamp life is 16,000 hrs.

Simple image changing is achieved by opening the hinged door, and locating the image in the magnetic clamps. The door is held firm against winds by gas struts, providing a stable base when changing images.

Electrical certification ensures all Interium products meet safety standards.

Quality manufacturing means the Civic display will continue to perform for many years to come. The product is supported by a 12 months warranty on general construction and OEM warranties supporting tubes and electronic ballasts.
