

Bankend Display

Designed for club and casino applications, the Bankend Display is mounted to the plinth at the end of a row of gaming machines. This makes use of a normally blank space, positioned to reach your potential customers at the moment they are choosing which game to play.

Based on the 40mm deep Tango, a "picture frame" profile, the Bankend display can be fitted with a hinging frame to allow operator access to the gaming machine's security functions.

Superior panel brightness is achieved through Interium's edge-lighting panel technology. The high brightness and even illumination supports a true representation of your graphic display.

T5 lamp technology The new generation 16mm fluorescent tubes deliver long operating life, high light output for power consumed and excellent colour rendering for your images. Average effective lamp life 16000 hrs.

Your frame colour choice can be achieved with powder-coated or spray painted finishes.

Electrical certification ensures all Interium products meet safety standards.

Quality manufacturing means your Bankend display should continue to perform for many years to come. The product is supported by a 12 months warranty on general construction and OEM warranties supporting tubes and electronic ballasts.
